
AXONIUS ENTERPRISE ASSET MANAGEMENT PROPOSAL
PROPOSED FOR: NORTHWESTERN MEDICINE

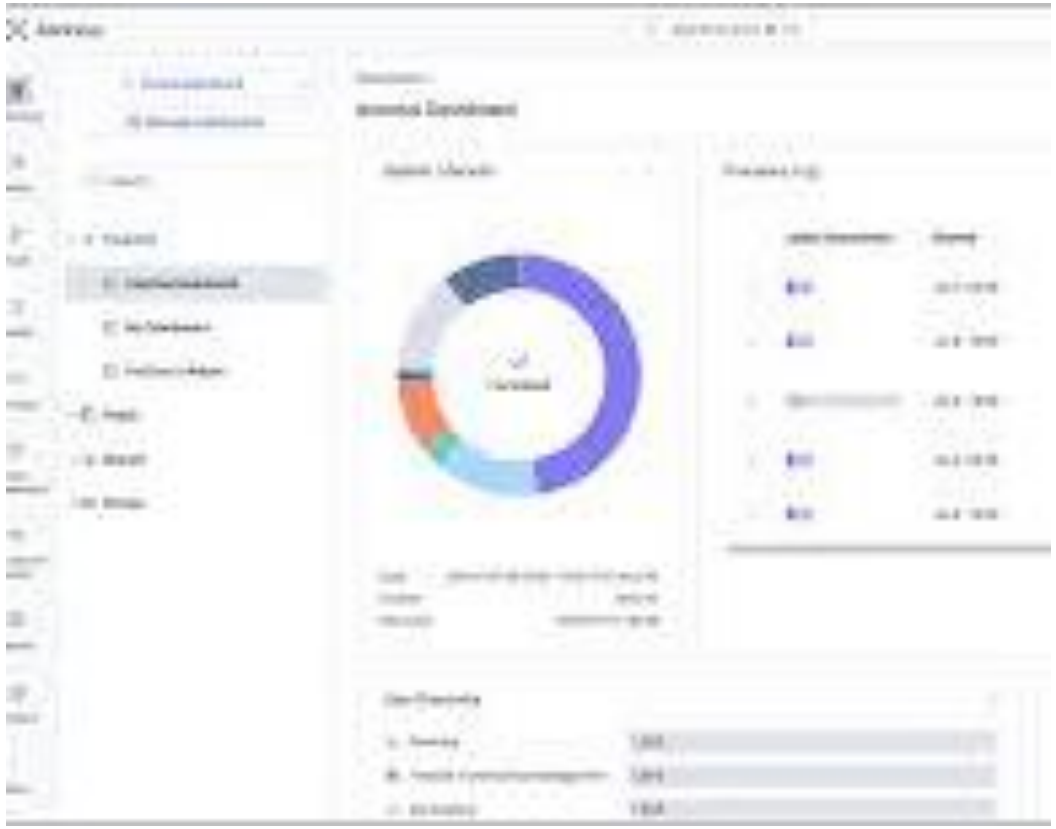
Maxine Jones
CYBR 550

PROBLEM

The Knowledge–Risk Matrix in Cybersecurity	**Known** (We are aware of it)	**Unknown** (We are not aware of it)
Known (We understand it)	✅ **Known Knowns** These are risks or assets we understand and actively manage. (Examples: CVEs in critical systems, Identified misconfigurations, Mapped assets in CMDB)	⚠️ **Unknown Knowns** Risks or assets we technically know about—but ignore, underestimate, or fail to act on. (Examples: Accepted risks with no real mitigation, Legacy systems "documented but ignored", Test credentials never revoked)
Unknown (We don't fully understand it)	🚨 **Known Unknowns** Areas we know are risky but haven't fully assessed or mapped. (Examples: Shadow SaaS tools– Third-party risk– AI plugin behavior– Unscanned low-code environments)	🔥 **Unknown Unknowns** Risks we don't even know exist—caused by complexity, emergence, or assumptions. (Examples: A forgotten API granting production access, A dormant container running with hardcoded secrets, A trust boundary collapsing via misconfigured identity federation, A chained attack across systems never designed to interoperate)

- Lack of asset visibility
- Shadow IT and unmanaged devices
- Security tools operate in silos
- Expanding attack surface

AXONIUS SOLUTION

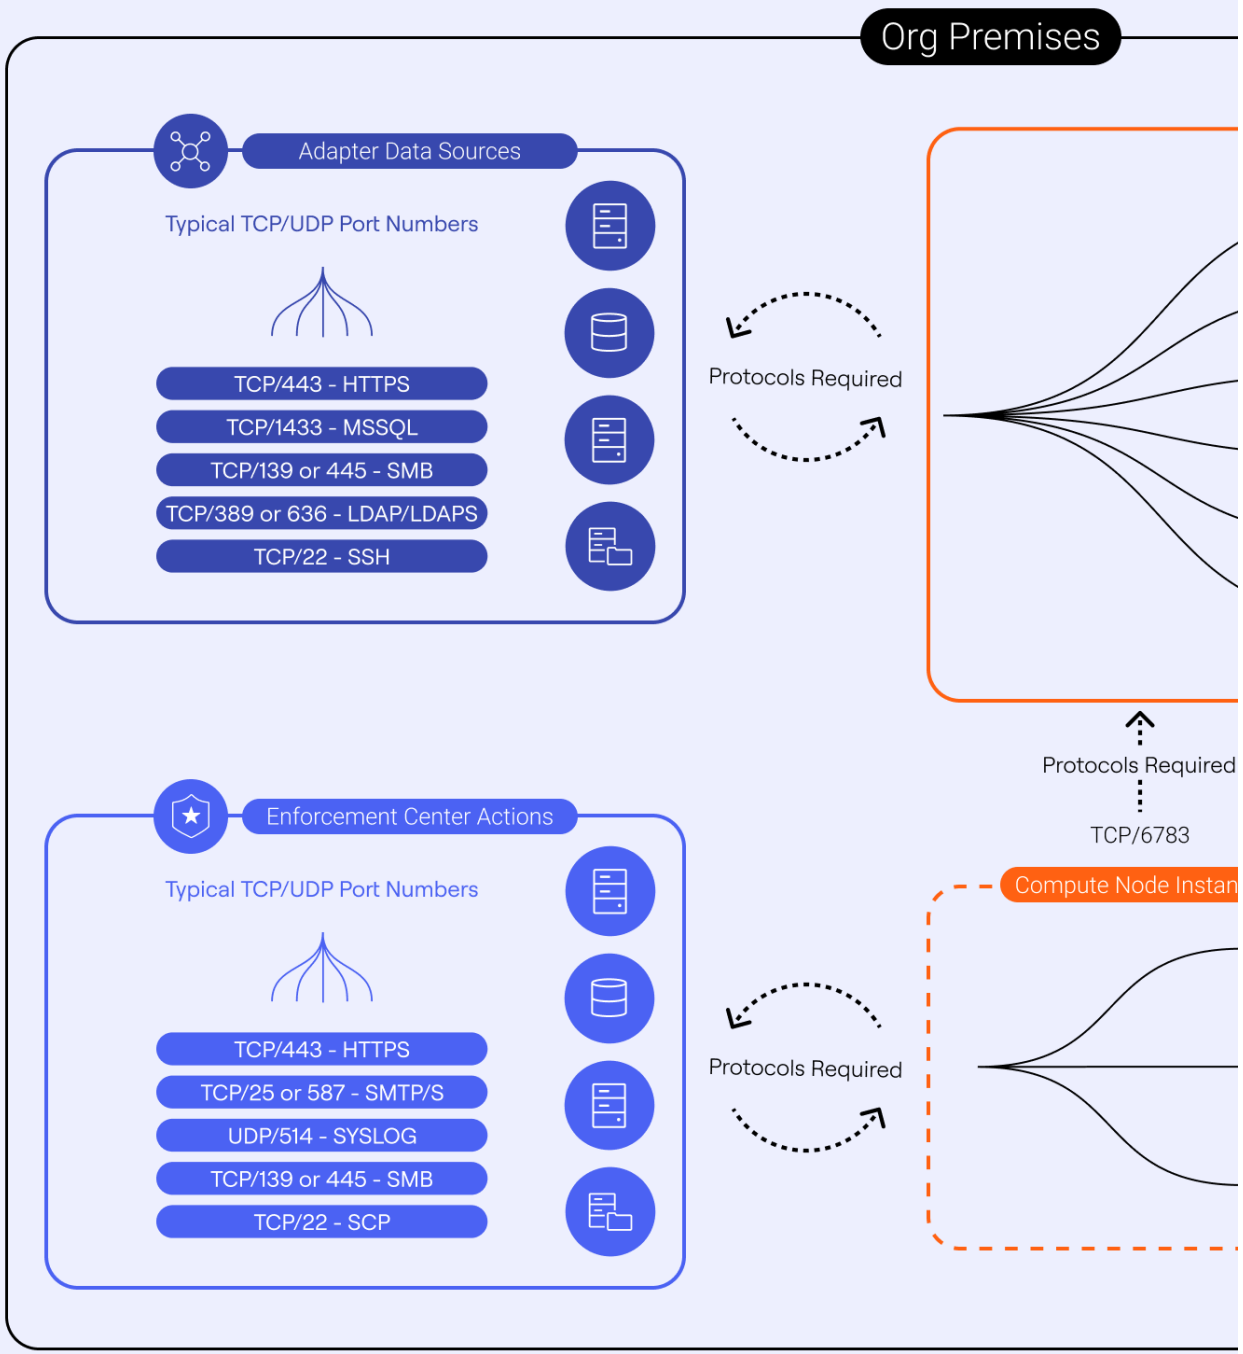


Problem:

- Disconnected asset data
- Unknown / unmanaged devices
- Incomplete inventory

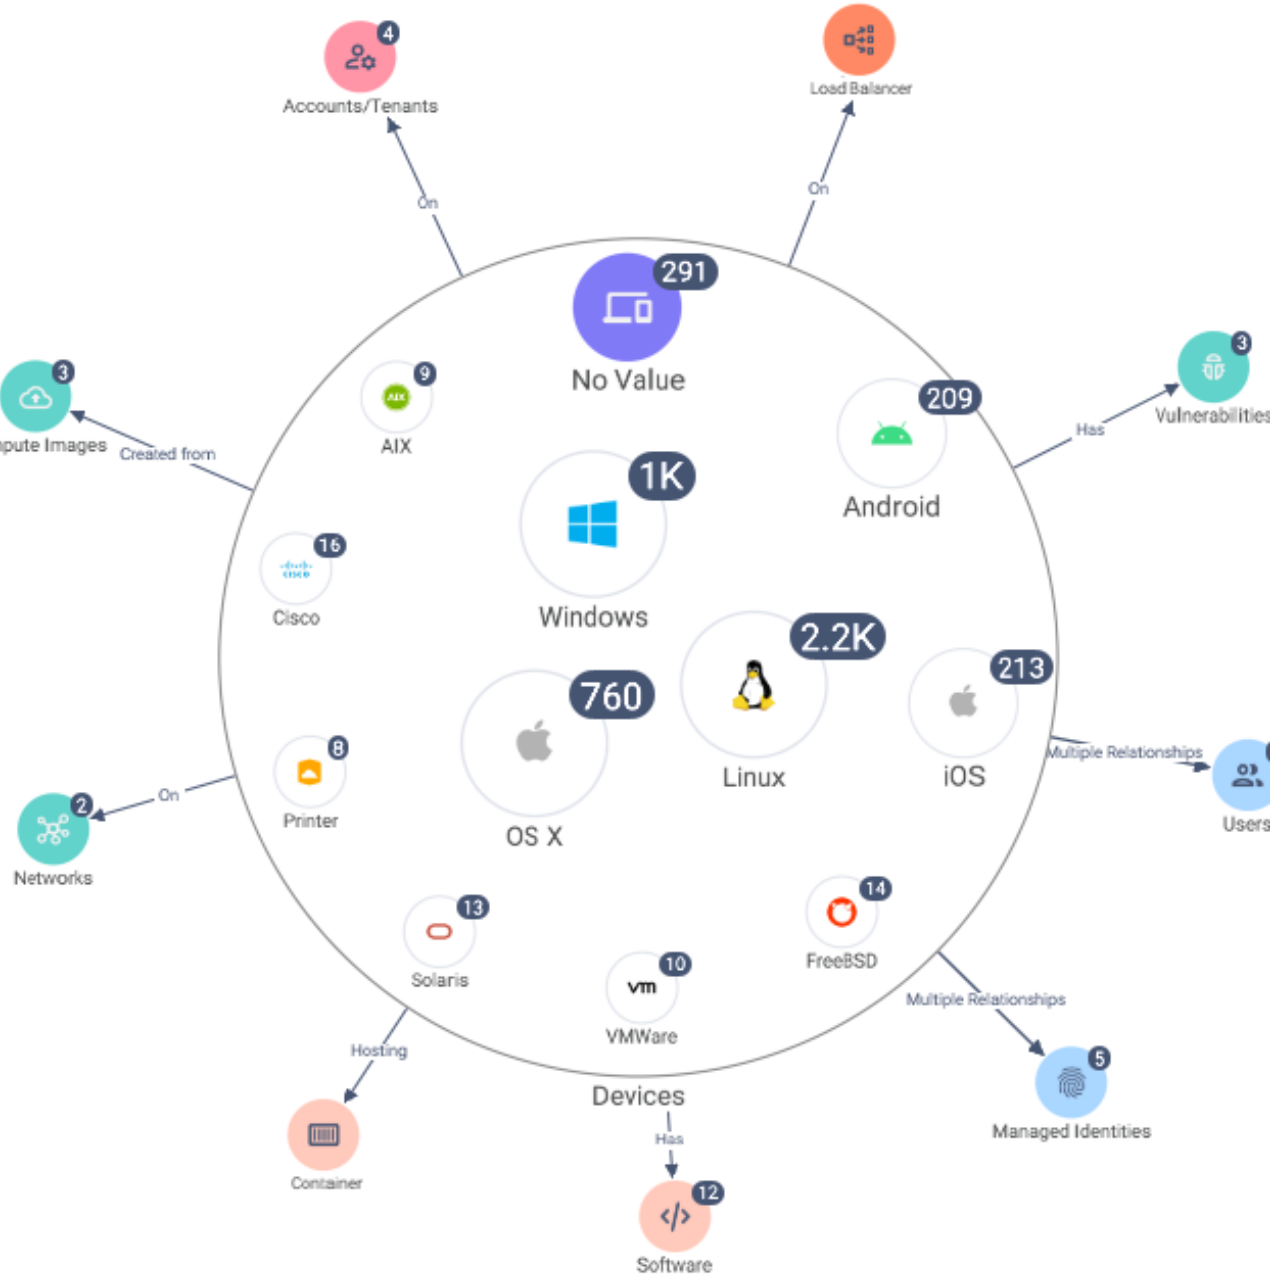
Solution:

- Unified asset inventory
- Aggregates data from existing tools
- Continuous, real-time visibility



HOW AXONIUS WORKS

- Connects to existing tools (SIEM, EDR, cloud)
- Aggregates asset data via APIs
- Correlates into unified inventory
- Continuously updates assets



BUSINESS VALUE (ASSET GRAPH)

- Improves enterprise-wide asset visibility
- Reduces cyber risk and attack surface
- Enables faster investigation and response
- Supports compliance (NIST, ISO)

COST & CONSIDERATIONS

- Estimated cost: $50K–$300K+ annually
- ~$90K typical mid-size deployment
- Subscription-based pricing model
- 30-day trial available
